

data.world with Eureka™

Automations and answers powered by knowledge graph

Harness the power of the knowledge graph to improve data team efficiency and productivity with Eureka™, a suite of catalog capabilities that simplify data management through intelligent, scalable automations. Eureka™ makes it easy to develop, discover, understand, and use trusted data products.

Automations

Eureka Automations™ make it faster and easier to deploy and manage your data catalog with impactful imports and enrichments.

Action Center

Eureka Action Center™ is a dynamic dashboard homepage that helps answer the question, “What do I need to take action on now?”

Answers

Eureka Answers™ surfaces the most relevant use cases, business terms, and metric from the knowledge graph to the top of your search.

Explorer

Eureka Explorer™ simplifies data landscape management, delivering powerful graph visualizations and technical column-level lineage.

Contextualize your catalog

Bridge the gap between how data consumers understand their business world and how your company stores its data. Eureka™ operationalizes the knowledge graph to deliver a more valuable, contextual data catalog that increases engagement and drives data literacy.
