The Solution for Today's Data Challenges

Accelerate your transition to a knowledge-centric organization with data.world's enterprise data catalog. Our cloud-native platform combines an intuitive user experience with a powerful knowledge graph to deliver enriched data discovery, governance, and actionable insights.

data.world powers the next-generation of

Data Discovery

Find and understand the data and analysis you need, wherever it lives. Across data sources and formats.

Agile Data Governance

Enable your teams to safely and actively work together to transform data into knowledge.

DataOps

Accelerate the flow of information between data producers and consumers and improve the resiliency of your data supply chain.

Data Mesh

Empower domain experts to own the data they create and make it available to consumers across business lines.

Semantic Layer

Simplify data integration and access with a single, semantically organized view of your trusted data assets.

Cloud Data Migration

Ensure business continuity and visibility at every stage of the migration process so you realize a quicker return on your cloud investment.

Knowledge-first design

Why does Facebook have such a powerful news feed, Apple and Amazon voice recognition? Google search, and Netflix show recommendations? Because under the hood is a knowledge graph that fuses data, context, semantics, and relationships together so that they're discoverable and queryable. This is how our knowledge graph-powered data catalog accelerates and enhances your data-driven enterprise.

Why data.world?

Extensible
Connect to, catalog, and discover anything in your data ecosystem.

Intuitive
Familiar design makes data work a snap for anyone in your organization.

Automated
Cloud-native, knowledge-graph-powered means transparent automation.

Find anything
Search, explore and understand

Collaboration
Real-time interactions between different teams and organizations

Knowledge
Navigate through data: datasets, projects and analyses

Built for collaboration
data.world helps everyone with data, from the data engineer running ETL jobs, to the analyst writing queries, to the data novice asking questions. Capture questions, ideas, and results alongside the data so you don't have to slow down to stay in sync.

Unlock data's value
Data and analytics work is hard to validate. data.world's cloud data catalog makes it easy to get more mileage from existing work by recording activity, making suggestions, and helping people discover relevant data and analysis.
